

Has your Par-Kut been with the company longer than you?

The 21st Century PAR-KUT is stronger, lasts longer and stays looking great year after year. That's because the last 20 years have brought significant improvements to the metal fabrication industry. And today's PAR-KUT better withstands physical and environmental abuse - they're nearly maintenance free.

- One piece welded steel construction is all galvanized (walls, roof and frame) - **enhancing longevity.**
- Windows and doors are anodized aluminum - **resisting corrosion and minimizing maintenance.**
- UL Approved electric - **safer and more dependable.**
- Treadplate flooring and double insulated wall construction - **add to the safety and comfort factor.**
- Epoxy primer and acrylic topcoat - **inhibit rust and fading.**

And PAR-KUT engineers can design a parking booth to compliment any architectural setting or meet any specification requirement. The advantages of upgrading to today's PAR-KUT are endless. Contact us and learn what a difference 20 years can make!

Isn't it time for a 21st CENTURY PAR-KUT?
