

SECURITY

saves . . .

. . . in more ways than one! Optimum performance is mandatory in today's volatile security environment. And the performance of a Par-Kut welded steel portable building provides the peace of mind that personnel will remain safe and comfortable. That saves concern. Constructed of low maintenance materials, Par-Kut booths outlast any other booth. That saves money. Par-Kut's bullet resistant construction ranges from UL 752 Level 1 up to Level 8. And that can save serious injury. Whether a guardhouse, inspection booth or surveillance / gun tower . . . a Par-Kut portable security building saves!
